

361 ENERGY CIC

361Energy CIC is a community energy organisation which promotes energy saving and renewable energy technologies. It operates within the area of the North Devon Biosphere Reserve. The main focus of the organisation this year is providing advice to those in fuel poverty and developing community owned renewable energy installations.

361 Community Energy

The majority of electricity generation in the UK is owned by six large energy companies. Money from our electricity bills is exported out of the local area, often going abroad due to foreign ownership of the energy companies.

When renewable energy installations are owned by the local community, it keeps more of the financial benefit in the local area. We are planning to install solar PV systems for free on local community and industrial buildings. The building owner benefits from cheaper daytime electricity while the installation will be funded by a community share issue. The local shareholders benefit from an attractive rate of interest and there will also be a community benefit fund.

This model has proved very successful in Plymouth where last year Plymouth Energy Community installed solar PV on over 20 schools. This year they have raised a further £850,000 and will be installing the largest rooftop solar PV system in the city on the Plymouth Life Centre.

Help us to repeat this successful model in North Devon.

If you have a suitable roof or want to know further information about the project, contact us at info@361energy.org

361 ENERGY CIC

361 Empower

The high cost of utility bills means that water and energy debt is a concern in our community. 361 Energy CIC are working in Ilfracombe in partnership with Scribes CIC, Encompass SW and One Ilfracombe to help local households.

The Empower project, funded with a grant from the Ebico Trust, offers assistance to those in water and fuel debt and advice on reducing utility bills. The service provides free one to one advice and home visits to show people how to cut costs and save energy. There are benefits for landlords with the service as well, which assists them to improve the energy efficiency of their properties by accessing funds for new boilers, loft, cavity and solid wall insulation.

Training sessions are also available for frontline staff and volunteer groups who are in contact with those who are struggling with fuel bills and heating their home.

More information is available through Scribes CIC at Transform 4 Work or by e-mailing: info@361energy.org

PETROC™
SCHOOL OF ARCHITECTURE, CONSTRUCTION
AND THE BUILT ENVIRONMENT

**Foundation Degree in Sustainable
Resource Management**

Are you interested in a change of career?
**Are you keen to work in the exciting, growing
industry caring for the environment?**

**If you answered yes, then our Foundation
Degree in Sustainable Resource management
could be for you.**

This qualification has received high acclaim from Plymouth University since it was set up two years ago. Among the subjects studied in this two year course are Renewable and Low Carbon energy, Sustainable Development and Sustainable Communities in this country and abroad, Sustainable Materials and Products. The course includes many visits and the opportunity to meet and work with local employers.
